

*BCF makes it  
easy to add  
barcodes to your  
Windows  
applications*

BCF® is a software package including a collection of TrueType™ barcode fonts and a Dynamic Link Library (DLL), which is used to translate text to barcode. An additional utility, BCF Assistant®, is also provided, for quickly creating barcodes to be pasted into other applications.

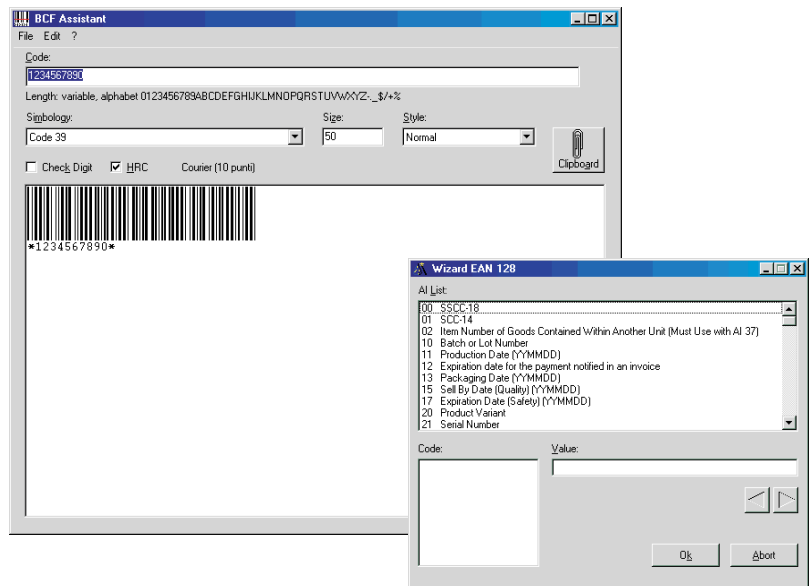

The fonts included are standard True Type™ fonts for Windows and allow the creation of barcodes in the following symbologies: Code 39, Code 39 Full Ascii, Code 93, Code 93 Full Ascii, ITF-14, Interleaved 2/5, Industrial 2/5, 5 Bars 2/5, 3 Bars 2/5, BCD Matrix 2/5, Code 11 Matrix, 2/5 Inverted, 2/5 Compressed, MSI, Plessey, Delta-Distance-A, EAN-13 (with and w/o add-on of 2 and 5 digits), EAN-8 (with and w/o add-on of 2 and 5 digits), UPC-A (with and w/o add-on of 2 and 5 digits), UPC-E (with and w/o add-on of 2 and 5 digits), Code 32 (with and w/o human readable characters in OCR font), Code C.I.P., Codabar/Monarch, Code 128, EAN 128, US Postnet, ISBN, ISBN 13.

The bar codes can be used in any Windows package that has the feature of allowing selection of font and sizes for text. The bar codes created following the directions in this manual can be read with traditional instruments, such as optical pen, CCD readers and laser scanners.

The DLL in the package is necessary to produce readable bar codes because it is not possible to simply apply the font to the information being encoded.

The images below show BCF Assistant, a free utility included in the package that lets you quickly and easily create bar codes in the supported symbologies, for pasting them inside other applications. It is very easy to use: select symbology, check digit, style and size, type in the code and press Enter; the barcode immediately appears in the window, ready to be copied and pasted into any Windows application that supports pasting.

The package is available in two languages (italian and english), with buttons, tooltips and manual in English language.
